

MODEL 3590

30" Capacity Whole Tree Chipper

The **ideal machine** for converting tops from logging and land clearing operations into dimensional chips. The Model 3590 transforms logging slash, land clearing waste and brush into a **uniform, saleable chip product** faster and more efficiently than ever before.

SUPERIOR PRODUCTION

Bandit whole tree chippers feature Bandit's unique infeed system, which combines to create one of the easiest feeding chippers on the market. This keeps operators busy feeding the machine instead of repositioning material.

FULLY PACK TRAILERS

We're known throughout the industry for packing chip trailers fuller and reducing the number of trips to the dump site. And Bandit can do it without the need for horsepower robbing, fuel chugging chip accelerators.

MAXIMIZE YOUR UPTIME

Bandit chippers are constructed to withstand the rigors of chipping every day, all day. We use only the highest quality components and materials during construction to help ensure that your machine will be ready to go to work when you are.

BUILT FOR YOU

Every Bandit chipper is built to order, with multiple options to fine tune your chippers for your job. Choose an engine, infeed drive systems, remote options, loaders and drum options, and get the chipper you need!

COMMITTED TO QUALITY & SERVICE

The Bandit Backbone™ Support

The Bandit Backbone is Bandit's commitment to customer service and support. It's always been a cornerstone of Bandit's philosophy, and today that backbone is stronger than ever. If you own a Bandit hand-fed chipper – regardless of the age, hours, or warranty status – the Bandit Backbone is here to support you.

We Are Here to Support You

There are nearly 200 dealer locations in the US and 61 international dealers to support you. They are factory trained. Plus we have an experienced parts and service department supporting you and our dealers.

GO-ANYWHERE TRACK MOBILITY

Caterpillar 325EL steel track undercarriage can be added to the 3590. This feature allows it to travel over rough terrain not accessible by towable units. It also eliminates the need to forward or skid material to the chipper – the operator can take the chipper to the trees.

TEST OUR METAL

When you choose a Bandit whole tree chipper, you'll experience more uniform chip production, smoother and more efficient chipping, long-lasting components and improved fuel economy. We invite you to see for yourself by scheduling a demo with your nearest authorized Bandit dealer.
