

# MODEL ZT1844

## Zero-Turn Stump Grinder

The ZT1844 features all the power and performance of every Bandit® stump grinder, but with features that make it an ideal machine for rental companies or dedicated stump grinding professionals. The wider swing arc **covers more area** when grinding at the stump. The taller grinding height and deeper grinding depth means you can tackle larger stumps and chase the roots deeper into the ground. And **intuitive controls** and zero-turn maneuverability make grinding stumps easy, no matter if you're a seasoned professional or a rental customer.

### ZERO TURN TRACKS

The ZT1844 rides on durable rubber tracks that easily take this machine across delicate lawns or through rough terrain. The tracks keep the grinder stable at the stump, and easily climb through chip piles to dig deeper into the stump. And when the job is done, the tracks help the machine climb quickly into the trailer so you can get on to the next job.

### POWERFUL EFI ENGINES

Choose either a 26.5 or 38 horsepower gasoline engine, featuring electronic fuel injection. These engines are easy to start, no matter your comfort level with small engines, making them a perfect option for rental companies or stump grinders who want to focus on the job and not an engine.

### INTUITIVE CONTROLS

Controls are mounted at the rear of the machine on a pivoting console, so no matter the position of the stump, you'll be able to get an excellent view of the grinding action. The sweep of the grinder is controlled by two levers on the console, and each track is controlled by independent levers.

### MOST PRODUCTIVE GRINDER

The Model ZT1844 features an extremely wide 44" cutter wheel swing and is able to grind 12" below grade, so stumps are obliterated and the area is ready for replanting. And tall stumps aren't a problem for this machine, either, with a cutter height of 22".
