

MODEL 2650SP

Hydrostatic Stump Grinder

The Bandit® Model 2650SP is an **outstanding mid-range stump grinder** with standard four-wheel drive and aggressive diesel engine options for power. It rides on dual drive wheels with flotation tires and grinds with an extremely wide cutter swing. The Model 2650SP is well-equipped to handle big stumps, however it also provides **excellent flotation** to gently traverse delicate lawns and maneuver in close quarters for smaller removals.

MAXIMUM UPTIME

The Model 2650SP's main advantage is the maintenance friendly hydrostatic direct-drive system. Powerful hydraulics operate the cutterwheel, turning quickly through stumps and chasing roots well below grade. Hydrostatic direct-drive systems eliminate costly routine maintenance on chain drive and belt drive systems, so operators are more productive at the end of the day.

CUSTOMIZE YOUR MACHINE

The Model 2650SP can be equipped with a variety of options to suit individual preferences and working conditions. Wireless radio control is available, allowing operators to control all machine functions from a remote location. The optional grading blade makes cleanup a snap. And custom colors are available to perfectly match your new stump grinder to the rest of your fleet.

OUTGRIND THE COMPETITION

Impressive grinding dimensions add to the overall productivity of the Model 2650, allowing it to tackle stumps of all sizes. Cutting dimensions include a cutter swing of 69", a cutting depth of 18.5", and a cutting height of 33", reducing the number of times the unit will need repositioned. This means operators will spend less time repositioning their machine and more time grinding stumps – meaning more productivity and more profit.
